Work Experience

Yodle

2012-Present

User Experience Manager

- Led user testing and A/B testing on Yodle.com which has **raised web conversion 30%**.
- Led the re-design and development of Yodle's newest CMS, powering over 10,000 of Yodle's client sites. Led to a **17% increase in client satisfaction** and a **60% improvement in setup time**.
- Pioneered Lean processes in conjunction with the Marketing team.
- Managed and mentored Interaction Designers, Visual Designers, and Front End Developers

2012

Lead UX Front Developer

- Led the design and development for over 100 templates for Yodle's previous CMS.
- Coordinated with Product Management and Client Services to prioritize template coverage needs based on sales velocity.

2011-2012

UX Front End Developer

- **Increased template quality and development speed** by standardizing design and dev processes.
- Designed and developed dozens of web templates.

2010-2011

Web Designer/Developer

- Created client sites and pioneered design/development techniques on newly built in-house CMS.
- Trained and supported Client Service Reps on in-house CMS.
- Mentored and trained fellow developers in best practices, including JavaScript and Firebug.

Freelance

2003-2010

Web Designer/Developer

- Designed and developed user-customizable websites for artists and writers.
- Designed and built lightweight CMS for clients to upload, edit, and maintain their own content.

Rebel Monkey Games

2007-2009

Lead Game Artist/Technical Artist

- Created 2D and 3D character and background art for Flash-based multiplayer casual games.
- Designed and developed an animated avatar system for users to customize their in-game characters along 20+ parameters.
- Created the front end for the game's virtual clothing store.
- Led a small team of art and development interns.
- Worked closely with engineers and the other artists to create pipelines for game assets.

Lindgren & Smith, Inc.

2001-2007

IT Specialist

- Developed and maintained multiple company websites.
- Created custom database solution to track clients, projects, and invoices.
- Built asset management database to catalog thousands of images by 40+ artists.
- Hired and managed part-time workers and interns.
